KARNATI KARUNYA KANTH

MSR Township, Macherla, Andhra Pradesh, India
+91 7396418556 Email LinkedIn GitHub

Summary

Computer Science undergraduate with strong skills in Python, SQL, Data Structures & Algorithms, and Object-Oriented Programming. Experienced in developing full-stack and AI-powered applications using modern technologies. Passionate about writing clean, efficient code and building scalable software solutions.

Education

Vishnu Institute of Technology 2023–2027
B.Tech in Computer Science Engineering CGPA: 8.59
Bhimavaram, Andhra Pradesh

Technical Skills

Programming Languages: Python, SQL
Web Technologies: HTML, CSS
Databases: MySQL, Firebase
Salesforce: SOQL, Lightning Web Components (LWC), Flow, Agentforce AI
Tools: Git, GitHub, VS Code, Salesforce CLI
Core CS Concepts: DSA, Object-Oriented Programming (OOP), DBMS
Familiar With: REST APIs, PySpark

Experience

Salesforce Administrator with Agentforce AI Intern May 2026 – July 2026
APSCHE Internship Program

- Developed and configured Salesforce CRM solutions using custom objects, SOQL, Lightning Web Components (LWC), and Flow automation.
- Configured validation rules, reports, dashboards, and business workflows to streamline student admission and support processes.
- Built an AI-Enabled Student Admission & Support Management System using Salesforce and Agentforce AI.
- Retrieved and managed Salesforce project metadata in Visual Studio Code using Salesforce CLI and GitHub for version control.

Projects

InterviewAce – Full-Stack Technical Interview Preparation Platform GitHub Live Demo
React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Swagger, Vercel

- Developed and enhanced a full-stack interview preparation platform featuring an Interview Readiness Score, study streak tracking, and progress analytics.
- Implemented modules for coding problem management, DSA and Core CS topic tracking, markdown-based study notes, and mock interview workflows.
- Built RESTful APIs, integrated MongoDB for data management, documented APIs using Swagger, and deployed the application on Vercel.

FounderIQ – AI Startup Idea Validator GitHub
Next.js, Tailwind CSS, FastAPI, Gemini 2.5 Flash, Firecrawl, Firebase

- Built an AI-powered platform that evaluates startup ideas and generates market insights including TAM, SAM, SOM, ROI, and competitor analysis.
- Integrated Gemini AI with Firecrawl to collect and analyze real-time market, competitor, and industry information.
- Developed an interactive dashboard to visualize startup feasibility metrics and support data-driven business decisions.

AI-Enabled Student Admission & Support Management System GitHub
Salesforce, SOQL, Lightning Web Components, Flow, Agentforce AI

- Developed a Salesforce-based CRM application to automate student admission and support workflows using custom objects and business process automation.
- Configured Lightning Web Components (LWC), SOQL, validation rules, reports, dashboards, and Flow automation to improve administrative efficiency.
- Retrieved Salesforce project metadata in Visual Studio Code using Salesforce CLI and maintained the project using GitHub.

Certifications and Achievements

- Mathematics for Machine Learning – NPTEL (77%)
- Joy of Computing Using Python – NPTEL
- Communication Skills – Stanford University
- Salesforce Certified Administrator with AI Agentforce Specialization – SmartBridge & APSCHE (2026)
