KARNATI KARUNYA KANTH

MSR Township, Macherla, Andhra Pradesh, India
+91 7396418556 Email LinkedIn GitHub

Summary

Computer Science undergraduate skilled in Python, SQL, Data Structures & Algorithms, and Object-Oriented Programming. Interested in Data Engineering, cloud technologies, and Generative AI, with internship training in AWS Gen AI and Data Engineering. Databricks Certified Data Engineer Associate with experience building software and AI-powered applications.

Education

Vishnu Institute of Technology 2023–2027
B.Tech in Computer Science Engineering CGPA: 8.59
Bhimavaram, Andhra Pradesh

Technical Skills

Programming Languages: Python, SQL
Data Engineering: Databricks, PySpark (Familiar), ETL Concepts
Cloud and AI: AWS, Generative AI
Web Technologies: HTML, CSS
Databases: MySQL, MongoDB
Tools: Git, GitHub, VS Code
Core CS Concepts: DSA, OOP, DBMS
Familiar With: REST APIs

Experience

AWS Gen AI & AWS Data Engineering Intern 2026
EduSkills – APSCHE Internship Program

- Studied Machine Learning fundamentals, applications, and the integration of Machine Learning with Generative AI.
- Explored NLP, advanced NLP techniques, and practical implementation of Generative AI concepts.
- Learned fundamental Data Engineering concepts, including data processing workflows and data management.
- Gained an understanding of cloud-based data solutions and the role of Data Engineering in building scalable data pipelines.

Projects

InterviewAce – Technical Interview Preparation Platform GitHub Live Demo
React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Swagger, Vercel

- Developed a full-stack interview preparation platform with readiness scoring, study streak tracking, and progress analytics.
- Implemented DSA and Core CS topic tracking across multiple technical areas to organize interview preparation.
- Built features for coding problem management, study notes, and mock interview workflows.
- Developed REST APIs, integrated MongoDB, documented APIs using Swagger, and deployed the application on Vercel.

FounderIQ – AI Startup Idea Validator GitHub
Next.js, Tailwind CSS, FastAPI, Gemini 2.5 Flash, Firecrawl, Firebase

- Built an AI-powered platform to evaluate startup ideas and generate market insights, including TAM, SAM, SOM, ROI, and competitor analysis.
- Integrated Gemini AI to generate AI-powered startup evaluations and business insights.
- Used Firecrawl to collect market, competitor, and industry information for startup idea analysis.
- Developed an interactive dashboard to present startup feasibility metrics and support data-driven decisions.

AI-Enabled Student Admission & Support Management System GitHub
Salesforce, SOQL, Lightning Web Components, Flow, Agentforce AI

- Developed a CRM application to manage student admission and support workflows using custom objects and automation.
- Configured Lightning Web Components to support student admission and administrative workflows.
- Used SOQL to retrieve and manage Salesforce records for application requirements.
- Configured validation rules, reports, dashboards, and Flow automation to support administrative processes.

Certifications and Achievements

- Databricks Certified Data Engineer Associate (Valid: Aug 2026 – Aug 2028)
- Mathematics for Machine Learning – NPTEL (77%)
- Joy of Computing Using Python – NPTEL
- Communication Skills – Stanford University
- Salesforce Certified Administrator with AI Agentforce Specialization – SmartBridge & APSCHE (2026)
